

Quantitative Data Appendices: Ottoman Empire and Venetian Republic

Infonomics Project — PhD-Level Empire Knowledge Base

APPENDIX A: OTTOMAN EMPIRE QUANTITATIVE DATA (c. 1299–1922)

1. Economic Indicators

1.1 GDP per capita estimates (1990 International Dollars — Maddison methodology)

Period	GDP per Capita	Source	Confidence
1500	\$600–650	Pamuk 2006, 2009; Maddison Project	MODERATE
1600	\$600–630	Pamuk 2009; van Zanden estimates	MODERATE
1700	\$600–650	Pamuk 2006, 2009	MODERATE
1820	\$740	Maddison Project Database; Pamuk	HIGH
1870	\$800–850	Bulut & Altay 2022; Pamuk	MODERATE
1913	\$850–950	Bulut & Altay 2022; Pamuk estimates	MODERATE

Methodological note: Ottoman GDP estimates rely on indirect methods linking real wages and urbanization to GDP per capita (Pamuk 2009). By 1820, Ottoman GDP per capita was approximately half that of Britain (~\$2,100) but comparable to Portugal, Poland, and the Iberian periphery. The "Little Divergence" with Northwestern Europe becomes pronounced after 1700.

1.2 Central government tax revenue as percentage of GDP

Period	Tax/GDP Ratio	Source	Confidence
16th century	<3%	Pamuk & Karaman 2010	HIGH
17th century	<3%	Pamuk & Karaman 2010	HIGH
18th century	<3%	Pamuk & Karaman 2010	HIGH
Early 19th century	5–7%	Pamuk, Ottoman State Finances	MODERATE

Period	Tax/GDP Ratio	Source	Confidence
1870s–1914	10–12%	Güran, Ottoman Financial Statistics	HIGH

Comparative context: England's tax/GDP ratio exceeded **10%** before the end of the 18th century (O'Brien and Hunt), demonstrating the significant Ottoman fiscal capacity gap that constrained state-building efforts.

1.3 Trade composition and major routes

Route/Port	Key Commodities	Peak Period	Confidence
Smyrna (İzmir)	Cotton, silk, textiles	17th–19th c.	HIGH
Aleppo	Persian silk (transit trade)	16th–18th c.	HIGH
Salonica	Cotton, textiles	18th–19th c.	HIGH
Constantinople	General trade hub	Throughout	HIGH
Red Sea (Suez)	Spices, coffee	16th–18th c.	MODERATE
Black Sea	Wheat, lumber	Throughout	HIGH

Trade partners (Istanbul, 1776–78): France held **44.1%** of trade share; England held **24.4%**.

1.4 Urbanization indicators

City	Period	Population	Source	Confidence
Constantinople	1453 (conquest)	40,000–50,000	Kaldellis, İnalcık	HIGH
Constantinople	c. 1500	200,000–300,000	Various scholars	MODERATE
Constantinople	c. 1600	400,000–700,000	Period estimates vary	LOW
Istanbul	1893 census	~900,000–1,000,000	Ottoman census	HIGH
Salonika	c. 1800	55,000	Wikipedia	MODERATE
İzmir	c. 1900	300,000	Various	MODERATE

2. Demographic Indicators

2.1 Total population estimates by period

Period	Population Estimate	Context	Source	Confidence
c. 1400	3–4 million	Early expansion	Modern estimates	LOW
c. 1500	12–14 million	Post-Mamluk conquest	Historical estimates	MODERATE
c. 1600	20–30 million	Peak classical period	Cambridge	MODERATE
c. 1700	20–25 million	Post-Habsburg wars	Various scholarly	MODERATE
1831 census	7.2 million	Incomplete (males only, excluding Istanbul)	Stanford Shaw	HIGH
1881–93 census	17–19 million	First modern census	Ottoman Statistics	HIGH
1914	~18.5 million	Pre-WWI	Ottoman official	HIGH

2.2 Crisis mortality events — major plagues

Period	Event	Estimated Impact	Source	Confidence
1347–1351	Black Death arrival	30–50% of affected populations	Cambridge	MODERATE
1533–1549	Major plague cycle	1,000–1,200 deaths/day (Istanbul peak)	Busbecq	MODERATE
1812–1819	Major epidemic	320,955 documented deaths	Wikipedia	HIGH

Plague duration: The Ottoman Empire experienced plague outbreaks almost continuously from **1347 to 1947** — a 600-year endemic cycle unique among major empires.

2.3 Devşirme system (child levy) numbers

Indicator	Value	Period	Source	Confidence
Total boys levied	200,000–300,000	15th–17th centuries	Multiple scholarly	MODERATE
Single documented levy	2,604 boys	1603–1604	Belleten (archival)	HIGH

Indicator	Value	Period	Source	Confidence
Levy frequency	Every 3–7 years	Classical period	Various	MODERATE
Age range	7–20 years (typically 8–10)	Throughout	Encyclopedia	HIGH

3. Financial Indicators

3.1 Akçe silver content and debasement patterns

Period	Silver Content (grams)	Index (1469–79=100)	Source	Confidence
1326 (founding)	~1.15–1.18g	—	Numismatic sources	HIGH
1469–1479	0.85g	100	Pamuk, Monetary History	HIGH
1481–1585	0.7–0.8g (stable)	~80–90	Pamuk 2000	HIGH
1585–1586	0.45–0.50g	~54	Pamuk	HIGH
1600	0.29g	~34	Pamuk data	HIGH
1700	0.13g	~15	Pamuk data	HIGH
1800	0.048g	~6	Pamuk	HIGH

Major debasement episodes: The **1585–1586 crisis** saw a **44% reduction** in silver content during the Safavid War. The "**Great Debasement**" of **1808–1844** reduced the kuruş by over **80%**, the worst monetary crisis in Ottoman history.

3.2 Foreign debt levels (post-1854)

Date	Debt Level	Event/Context	Source	Confidence
1854	First foreign loan	Crimean War financing	Multiple sources	HIGH
1875 (default)	£191–214 million	Pre-default nominal	Britannica; Cambridge	HIGH
1881 (restructured)	£106 million	Decree of Muharrem	Britannica	HIGH
1914	139.1 million Turkish liras	Pre-WWI	Wikipedia	HIGH

OPDA (Ottoman Public Debt Administration, 1881–1928): Controlled **25–33% of state revenue** through monopolies on salt, tobacco, spirits, silk tithes, and stamp duties. Employed **5,000–9,000 personnel** at peak operations.

3.3 Interest rates

Source	Rate	Period	Context	Confidence
Cash waqfs (Bursa)	10–15%	16th–18th c.	Lower-tier capital market	HIGH
Sarrafs/Galata bankers	20–30%	18th–19th c.	Private lending	MODERATE
Galata bankers (1874 crisis)	25%+ refused	Pre-default	Extreme risk premium	HIGH

3.4 Banking institutions

Institution	Established	Capitalization/Notes	Confidence
Sarrafs (money-changers)	Medieval	Primary credit providers	HIGH
Galata Bankers	18th c.	Family-based (Armenian, Greek, Jewish)	HIGH
Bank-ı Osmani	1856	£500,000 (25,000 shares × £20)	HIGH
Imperial Ottoman Bank	1863	Anglo-French; 30-year note monopoly	HIGH

4. Institutional Indicators

4.1 Complete sultan list with succession analysis (36 sultans, 1299–1922)

#	Sultan	Reign	Length	Succession Type
1	Osman I	c. 1299–1323/4	~24 years	FOUNDER
2	Orhan	1324–1362	~38 years	PEACEFUL
3	Murad I	1362–1389	~27 years	PEACEFUL
4	Bayezid I	1389–1402	~13 years	PEACEFUL
—	<i>Interregnum</i>	1402–1413	11 years	Civil war

#	Sultan	Reign	Length	Succession Type
5	Mehmed I	1413–1421	8 years	VIOLENT
6	Murad II	1421–1451	~28 years	PEACEFUL
7	Mehmed II	1451–1481	30 years	PEACEFUL
8	Bayezid II	1481–1512	31 years	CONTESTED
9	Selim I	1512–1520	8 years	VIOLENT
10	Süleyman I	1520–1566	46 years	PEACEFUL
11	Selim II	1566–1574	8 years	PEACEFUL
12	Murad III	1574–1595	21 years	PEACEFUL
13	Mehmed III	1595–1603	8 years	PEACEFUL
14	Ahmed I	1603–1617	14 years	PEACEFUL
15	Mustafa I	1617–1618; 1622–1623	~1.3 years	MIXED
16	Osman II	1618–1622	4 years	PEACEFUL
17	Murad IV	1623–1640	17 years	PEACEFUL
18	İbrahim	1640–1648	8 years	PEACEFUL
19	Mehmed IV	1648–1687	39 years	VIOLENT
20	Süleyman II	1687–1691	4 years	VIOLENT
21	Ahmed II	1691–1695	4 years	PEACEFUL
22	Mustafa II	1695–1703	8 years	PEACEFUL
23	Ahmed III	1703–1730	27 years	VIOLENT
24	Mahmud I	1730–1754	24 years	VIOLENT
25	Osman III	1754–1757	3 years	PEACEFUL
26	Mustafa III	1757–1774	17 years	PEACEFUL
27	Abdülhamid I	1774–1789	15 years	PEACEFUL

#	Sultan	Reign	Length	Succession Type
28	Selim III	1789–1807	18 years	PEACEFUL
29	Mustafa IV	1807–1808	~1 year	VIOLENT
30	Mahmud II	1808–1839	31 years	VIOLENT
31	Abdülmecid I	1839–1861	22 years	PEACEFUL
32	Abdülaziz	1861–1876	15 years	PEACEFUL
33	Murad V	1876	93 days	VIOLENT
34	Abdülhamid II	1876–1909	33 years	PEACEFUL
35	Mehmed V	1909–1918	9 years	VIOLENT
36	Mehmed VI	1918–1922	4 years	PEACEFUL

4.2 Succession statistics

Category	Count	Notes
Total sultans	36	Osman I to Mehmed VI
Peaceful successions	~23	Natural death/abdication
Violent successions	~13	Deposition, murder, civil war
Average reign length	17.3 years	Full span 1299–1922
Longest reign	Süleyman I: 46 years	
Shortest reign	Murad V: 93 days	
Fratricide period	1362–1603	Murad I to Ahmed I
Kafes period	1603–1922	Post-Ahmed I confinement system

4.3 Major institutional reforms

Date	Reform	Significance
c. 1365	Janissary Corps founded	Elite infantry under Murad I

Date	Reform	Significance
c. 1395	Devşirme system begins	Systematic child levy
1453	Constantinople conquered	Capital established
c. 1470s	Code of Mehmed II	Fratricide legalized
1517	Caliphate absorbed	Post-Mamluk conquest
1603	End of active fratricide	Ahmed I spares brother
1617	Succession law change	Agnatic seniority (ekberiyet)
1826	Janissary Corps abolished	"Auspicious Incident"
1839	Tanzimat begins	Gülhane Edict
1856	Imperial Reform Edict	Legal equality for non-Muslims
1876	Ottoman Constitution	First parliamentary period
1908	Young Turk Revolution	Constitutional restoration
1922	Sultanate abolished	End of Ottoman Empire

5. Military Indicators

5.1 Janissary corps size over time

Period	Size	Context	Source	Confidence
Late 14th c.	~1,000	Initial corps	Nicolle	MODERATE
1475	~6,000	Classical era	Nicolle	MODERATE
1527–28	~27,049	Süleyman's reign	Accounting records	HIGH
Late 17th c.	~67,000	Peak as fighting force	Discovery UK	MODERATE
1694–95	78,798	Nominal rolls	Historical records	MODERATE
1826 (abolition)	100,000–135,000	Mostly non-combatants	Wikipedia	HIGH

Note: Post-17th century numbers are inflated by "paper soldiers" and civilians holding positions. Active combatants were approximately **30%** of nominal strength by the late 18th century.

5.2 Total military mobilization

Period	Component	Size	Confidence
Classical period	Standing army	~60,000	MODERATE
Classical period	Full mobilization	~180,000	MODERATE
Battle of Mohács (1526)	Field army	60,000–100,000	HIGH
WWI mobilization	Total mobilized	2,850,000	HIGH
WWI end (1918)	Remaining under arms	323,000	HIGH

5.3 Major battles with casualty figures

Battle	Date	Ottoman Losses	Enemy Losses	Confidence
Battle of Mohács	Aug 29, 1526	~2,000 killed	14,000–18,000 Hungarian	HIGH
Battle of Lepanto	Oct 7, 1571	25,000–40,000; ~200 ships	7,500–10,000 Holy League	HIGH
Battle of Zenta	1697	~30,000 killed	Minimal	MODERATE
Gallipoli (WWI)	1915–16	250,000 (56,643 KIA)	~300,000 Allied	HIGH
WWI Total	1914–18	771,844 dead (Erickson)	—	MODERATE

5.4 Territorial extent

Period	Area (km²)	Context	Confidence
c. 1300	~5,631	Foundation beylik	MODERATE
1453	~2,214,000	Post-Constantinople	MODERATE
1520	~6,557,000	Post-Mamluk conquest	MODERATE
1683 (Peak)	~5.2 million	Pre-Vienna	HIGH
1800	~3.5–4 million	Post-Karlowitz losses	MODERATE

Period	Area (km ²)	Context	Confidence
1914	~1.8 million	Pre-WWI	HIGH

6. Data Limitations and Gaps

6.1 Significant scholarly disagreements

1. **Istanbul population c. 1600:** Estimates range from 400,000 to 700,000
2. **Peak territorial extent:** 5.2 million km² (direct control) vs. 14–24 million km² (including vassals)
3. **Pre-modern population:** Estimates vary by 50–100% between scholars
4. **WWI casualties:** Official Ottoman (325,000) vs. Erickson (771,844)

6.2 Major data gaps

- No reliable population figures before 1831
- Limited plague mortality statistics for pre-19th century
- Navy personnel numbers largely undocumented
- Defense spending as % of revenue requires further archival research
- No disaggregated GDP measures by region

7. Source Bibliography — Ottoman Empire

Primary Academic Sources:

- Pamuk, Şevket. *A Monetary History of the Ottoman Empire* (2000)
- Pamuk, Şevket. "Ottoman State Finances in European Perspective, 1500–1914." *Journal of Economic History* (2010)
- Karaman, K. & Pamuk, Ş. "Ottoman State Finances in European Perspective." *Journal of Economic History* 70.3 (2010)

APPENDIX B: VENETIAN REPUBLIC QUANTITATIVE DATA (c. 697–1797)

1. Economic Indicators

1.1 GDP per capita estimates — Northern Italy (1990 International Dollars)

Period	GDP per Capita	Source	Confidence
c. 1300	~\$1,500–1,600	Malanima (2011)	MODERATE
c. 1350	~\$1,600–1,700	Malanima — post-Black Death increase	MODERATE
c. 1400	~\$1,650	Malanima (2011)	MODERATE
c. 1450	~\$1,700–1,800	Malanima — "Renaissance efflorescence"	MODERATE
c. 1500	\$1,100 (Maddison) / \$1,500 (Malanima)	Divergent estimates	LOW
c. 1600	~\$1,100	Maddison (2001)	MODERATE
c. 1700	~\$1,100	Maddison (2001)	MODERATE
c. 1800	~\$1,117	Maddison (2001)	MODERATE

Key finding: Malanima (2011) documents "The Long Decline of a Leading Economy" in the *European Review of Economic History*. GDP per capita rose **20–30%** in the two decades following the Black Death (1348), reached a Renaissance peak (~1450s) at 20–30% above pre-1347 levels, then entered definitive decline after ~1470.

1.2 Trade volume estimates — spice trade

Metric	Value	Period	Source	Confidence
Pepper imports to Europe via Venice	750–900 tons/year	Late 15th c.	Encyclopedia.com	MODERATE
Other spices via Venice	<450 tons/year	Late 15th c.	Encyclopedia.com	MODERATE
Market share — pepper	60–75% of European imports	14th–15th c.	Multiple	MODERATE
Pepper markup	61→120 ducats (Alexandria→Venice)	16th c.	Essay sources	MODERATE
Customs from cotton & spices	300,000–400,000 ducats/year	15th c.	Essay sources	MODERATE

1.3 State revenues and expenditure

Category	Amount	Period	% of Budget	Confidence
Salt Office (net)	165,000 ducats	1464	~15%	HIGH
Customs revenues	1.4 million ducats/year	Early 15th c.	~40%	MODERATE
Terraferma tribute	—	Mid-15th c.	~30%	MODERATE
Interest payments on Monte	155,000 ducats	15th c.	~25% expenditure	MODERATE
Cyprus revenue	300,000+ ducats/year	Pre-1570	—	MODERATE

1.4 Shipping capacity

Metric	Value	Period	Source	Confidence
Merchant fleet tonnage	73,500 tons	c. 1450	Lane	MODERATE
Arsenal fleet tonnage	7,000 tons	15th c.	Lane	MODERATE
Arsenal peak workforce	Up to 16,000 workers	Early 16th c.	Grokikipedia	HIGH
Share of state budget	~10%	15th–17th c.	Multiple	HIGH

2. Demographic Indicators

2.1 Venice city population

Period	Population	Event/Context	Source	Confidence
1000	~60,000	—	Wikipedia	MODERATE
1200	~80,000	—	Wikipedia	MODERATE
1300	110,000–180,000	Peak medieval	Multiple	MODERATE
1338 (pre-Black Death)	~100,000–120,000	—	ResearchGate	MODERATE
1348 (post-plague)	~50,000–60,000	~40–50% mortality	Derived	MODERATE
c. 1500	~100,000–110,000	Census-based	Britannica	HIGH
1575 (pre-plague)	~170,000	—	Cambridge	HIGH
1586 (post-plague)	148,637	Beltrami census	Cambridge MS	HIGH
1624 (pre-plague)	141,625	—	Scientific Reports	HIGH
1633 (post-plague)	102,243	—	Scientific Reports	HIGH
c. 1700	~130,000–140,000	—	Scholarly estimates	MODERATE
1797	~130,000	Republic falls	Various	MODERATE

2.2 Total Venetian Republic population (1557 — peak)

Territory	Population	Source	Confidence
Total Republic	~2,300,000	Statista	HIGH
Terraferma (mainland Italy)	~1,700,000	Statista	HIGH
City of Venice	~170,000	Statista	HIGH
Crete (Kingdom of Candia)	~260,000	Wikipedia	MODERATE

Territory	Population	Source	Confidence
Cyprus	~180,000	Statista	MODERATE

Territorial extent at peak (c. 1500): ~70,000 km² with 2.1 million inhabitants.

2.3 Crisis mortality events

Event	Period	Pre-Event Pop.	Deaths	Mortality Rate	Confidence
Black Death	1348	~100,000	~40,000–50,000	40–50%	MODERATE
Plague of 1575–77	1575–77	~170,000+	~60,000+	~33%	HIGH
Plague of 1630–31	1630–31	141,625	43,088–46,000	~28–33%	HIGH

Crete population collapse (Cretan War, 1645–1669): Population fell from ~260,000 to ~80,000 — a **69% decline** due to war, siege, and associated mortality. Grokikipedia

3. Financial Indicators

3.1 Currency standards — Gold Ducat (Zecchino)

Parameter	Value	Source	Confidence
Introduction date	1284 (Doge Giovanni Dandolo)	Multiple	HIGH
Weight	3.545 grams	Wikipedia/Britannica	HIGH
Fineness	99.47% pure gold (23.75 carats)	Lane & Mueller	HIGH
Pure gold content	~3.53 grams	Calculated	HIGH
Standard duration	1284–1797 (513 years unchanged)	Multiple	HIGH

Remarkable stability: The Venetian ducat maintained consistent weight, fineness, and design for over **500 years** — the longest continuously minted coin type with unchanged standards in monetary history.

3.2 Silver Grosso (Matapan)

Parameter	Value	Source	Confidence
Introduction date	1193–1194 (Doge Enrico Dandolo)	Stahl/Wikipedia	HIGH
Original weight	2.18 grams	Lane & Mueller	HIGH
Fineness	98.5% pure silver	Multiple	HIGH
Initial value	26 denarii	Wikipedia	HIGH

3.3 Government debt system — the Monti

Prestiti and Monte Vecchio

Parameter	Value	Source	Confidence
First forced loan	1167 (vs. Byzantine Empire)	Tontine Coffee-House	HIGH
Monte Vecchio established	1262	Mueller (1997)	HIGH
Initial debt stock (1262)	154,000 ducats	Mueller	HIGH
Nominal interest rate	5% (paid semi-annually)	Lane & Mueller	HIGH
Debt stock (1299)	500,000+ ducats	Mueller	HIGH
Debt stock (late 1370s)	4.7 million ducats	Mueller	HIGH
Debt stock (1428)	9 million ducats	Mueller	HIGH

Bond prices (% of face value)

Period	Price	Event	Confidence
1262–1375	90–100%	Stable period with 5% coupon	HIGH
1378–1382	18–19%	Interest suspended (War of Chioggia)	HIGH
c. 1400	60–66%	Post-sinking fund recovery	MODERATE
1474	13%	Ottoman Wars impact	MODERATE
Early 1500s	3–10%	Monte Vecchio collapse	MODERATE

Later Monti series

Fund	Established	Interest Rate	Context
Monte Nuovo	1482	5%	War with Ferrara
Monte Nuovissimo	1509	Variable	Post-Agnadello defeat
Monte Sussidio	1526	Variable	Further wars
Depositi in Zecca	1528	Market rate	Fiscal reform

Note: By 1600, Venice had reportedly **repaid all public debt** (Pezzolo), enhancing fiscal reputation.

3.4 Interest rates

Period	Rate Type	Rate	Source	Confidence
1262–1377	Government bond nominal	5%	Homer & Sylla	HIGH
Post-1377	Government bond nominal	4% (variable)	Mueller	HIGH
1522–1573	Effective yield	3.88% avg.	Fратиanni & Spinelli	MODERATE
1574–1603	Effective yield	2.59% avg.	Fратиanni & Spinelli	MODERATE
16th–17th c.	Private/commercial	6–14%	Coinlands	MODERATE

3.5 Banking institutions

Banco della Piazza di Rialto (1587–1637)

Parameter	Value	Confidence
Established	1587	HIGH
Model	100% reserve, state-supervised	HIGH
Peak deposits	1.7 million ducats (1618)	MODERATE
Peak depositors	~4,000	MODERATE
Legal tender status	1593 (for bills of exchange)	HIGH

Banco del Giro (1619–1797)

Parameter	Value	Confidence
Established	1619	HIGH
Reserve basis	Fractional (backed by government debt)	HIGH
Legal tender	1651 (for payments over 50 ducats)	MODERATE
Convertibility restored	1666	HIGH
Suspension	1714–1739 (Ottoman-Venetian War)	HIGH

Historical significance: The Banco Giro is described as "the likely first experiment with a purely fiduciary state-issued legal-tender money" and provided the model for Genoa's Banco di San Giorgio reorganization (1675).

4. Institutional Indicators

4.1 Doge succession summary (120 Doges, 697–1797)

Metric	Value
Total doges	120 (by traditional count)
Total duration	~1,100 years
Average reign duration	~9–10 years

Metric	Value
Historically attested first doge	Orso Ipato (726–737)
Longest-reigning doge	Francesco Foscari (1423–1457): 34 years
Last doge	Ludovico Manin (1789–1797)

Selected notable doges:

#	Name	Reign	Significance
3	Orso Ipato	726–737	First historical doge; murdered
41	Enrico Dandolo	1192–1205	Led Fourth Crusade
52	Marino Faliero	1354–1355	Executed for coup attempt
65	Francesco Foscari	1423–1457	Longest reign; forced abdication
87	Alvise Mocenigo I	1570–1577	Lepanto victory
108	Francesco Morosini	1688–1694	Morean War victor
120	Ludovico Manin	1789–1797	Abdicated to Napoleon

4.2 Electoral procedure (1268–1797)

The Venetian doge election used a complex multi-stage lottery and voting system designed to prevent factionalism:

1. 30 members selected by lot from Great Council
2. Reduced to 9 by lot → 9 nominate 40 electors
3. 40 reduced to 12 by lot → 12 choose 25 candidates
4. 25 reduced to 9 by lot → 9 nominate 45 candidates
5. 45 reduced to 11 by lot → 11 select 41 final electors
6. 41 elect Doge by majority (minimum 25 votes required)

This system remained **unchanged for 529 years** (1268–1797).

4.3 Great Council (Maggior Consiglio) membership

Period	Members	Event	Confidence
Pre-1297	Variable	Open to qualified citizens	MODERATE
1297 (Serrata)	~200 families	Closure enacted	HIGH
Post-Serrata	~950 members	107 additional families co-opted	MODERATE
14th century	Up to ~2,000	Expansion	HIGH
16th century	Up to 2,095	Peak documented	HIGH

4.4 Serrata of 1297 — key data

Indicator	Value	Confidence
Date enacted	February 28, 1297	HIGH
Doge	Pietro Gradenigo	HIGH
Families included	~200 (becoming hereditary nobility)	HIGH
Final closure	1319	HIGH
Golden Book (Libro d'Oro) established	1315	HIGH
Pre-Serrata exit rate	~1.2% annually	MODERATE
Post-Serrata exit rate	~0.14% annually	MODERATE

4.5 Major institutional reforms

Date	Reform	Significance
1172	Great Council established	Formal oligarchic institution
1179	Council of Forty (Quarantia) created	Judicial body
1229	Senate (Pregadi) formalized	Legislative refinement
1268	Complex doge election procedure	Anti-faction mechanism

Date	Reform	Significance
1297	Serrata del Maggior Consiglio	Aristocratic closure
1310	Council of Ten created	Response to Tiepolo conspiracy
1315	Libro d'Oro established	Noble registry
1319	Final closure of Great Council	—
1423	Popular assembly (Concio) dissolved	—
1455	Council of Ten made permanent	—
1539	State Inquisitors established	Security apparatus
1587	Banco della Piazza di Rialto	First public bank

5. Military Indicators

5.1 Naval strength — Venetian Arsenal

Indicator	Value	Period	Confidence
Peak workforce	~16,000	Early 16th c.	HIGH
Peak production	~1 galley per day	16th c.	HIGH
Wartime surge	50 galleys in 10 months	1537–38	HIGH
Stored hulls in reserve	Up to 100 galleys	16th c.	HIGH
Arsenal area	~45 hectares (110 acres)	Peak	HIGH
Annual payroll	140,000 ducats	16th c.	MODERATE

5.2 Fleet sizes

Period	Fleet Composition	Source	Confidence
1423 (Doge Mocenigo inventory)	45 galleys; 300 large cargo ships; 3,000 smaller craft; 33,000 seamen	Britannica	HIGH

Period	Fleet Composition	Source	Confidence
1571 (Lepanto)	109 galleys + 6 galleasses	New World Encyclopedia	HIGH
1645 (Cretan War)	60–70 galleys + 4 galleasses + ~36 galleons	Wikipedia	HIGH

5.3 Major battles with casualty figures

Battle	Date	Venetian Forces	Casualties	Outcome	Confidence
Fourth Crusade	1202–04	500 ships; ~30,000 crew	Minimal combat losses	Venetian-led victory	MODERATE
War of Chioggia	1378–81	14→34 galleys rebuilt	Fleet destroyed (Pola)	Strategic victory	HIGH
Battle of Lepanto	Oct 7, 1571	109 galleys + 6 galleasses	~7,500–8,000 Holy League dead	Decisive victory	HIGH
Cretan War	1645–69	60–70 galleys	~30,000+ Venetian/Allied; 100,000+ Ottoman	Loss of Crete	MODERATE
Morean War	1684–99	Variable	—	Victory (Treaty of Karlowitz)	HIGH

Battle of Lepanto details: The Holy League fleet (206–212 galleys, 30,000 soldiers) faced ~280–300 Ottoman galleys. Ottoman losses: **25,000–30,000 dead**; 130–200 ships captured or sunk.

5.4 Territorial extent by period

Period	Key Holdings	Estimated Extent
1000	Venice lagoon, Dalmatian coast	Small
1204	+3/8 of Byzantine Empire (Crete, Euboea, Greek islands)	Major expansion
1400	+Terraferma expansion begins	Growing
1500	Peak: ~70,000 km²	Maximum
1573	Lost Cyprus	Declining
1669	Lost Crete	Major loss

Period	Key Holdings	Estimated Extent
1718	Lost Morea (Treaty of Passarowitz)	Significant loss
1797	Venice + Terraferma + Dalmatia only	Final

6. Cross-Empire Comparison Tables

6.1 Economic comparison — Ottoman vs. Venetian

Indicator	Ottoman Empire	Venetian Republic	Notes
GDP per capita (c. 1500)	\$600–650	\$1,100–1,500	Venice ~2x higher
GDP per capita (c. 1700)	\$600–650	\$1,100	Gap persists
Tax/GDP ratio (16th c.)	<3%	Higher (undefined)	Ottoman fiscal weakness
Currency stability	Major debasement (1585–1844)	513 years unchanged ducat	Venice exceptional
Public debt innovation	Post-1854 foreign loans	Monte system from 1262	Venice pioneered
Peak trade routes	Levant, Black Sea, Red Sea	Levant, spice monopoly	Overlapping competition

6.2 Demographic comparison

Indicator	Ottoman Empire	Venetian Republic
Peak population	~30 million (c. 1600)	~2.3 million (1557)
Capital city peak	700,000 (Istanbul, debated)	200,000 (Venice, c. 1600)
Plague duration	600 years (1347–1947)	Multiple severe outbreaks
1630–31 plague mortality	—	28–33% (Venice city)

6.3 Institutional comparison

Indicator	Ottoman Empire	Venetian Republic
Regime duration	623 years (1299–1922)	~1,100 years (697–1797)

Indicator	Ottoman Empire	Venetian Republic
Total rulers	36 sultans	120 doges
Average reign	17.3 years	~9–10 years
Violent successions	~36% (13/36)	Very rare (elections)
Succession system	Fratricide → Kafes → Seniority	Complex lottery + voting
Key reform dates	1839 (Tanzimat), 1876 (Constitution)	1297 (Serrata), 1310 (Council of Ten)

6.4 Military comparison

Indicator	Ottoman Empire	Venetian Republic
Peak territory	~5.2 million km² (1683)	~70,000 km² (1500)
Elite force	Janissary corps (~67,000 peak)	Arsenal-built galley fleet
Naval production	Rebuilt 150 galleys post-Lepanto (1572)	1 galley/day at peak
Lepanto forces	~280 galleys	109 galleys + 6 galleasses
Lepanto losses	25,000–40,000 dead	~7,500 Holy League total

7. Data Limitations and Gaps

7.1 Ottoman Empire

- **GDP before 1820:** Based on indirect methods; no direct output measures
- **Regional variation:** Available GDP estimates do not capture provincial diversity
- **Pre-1831 population:** No reliable census data
- **Plague mortality pre-19th c.:** Poorly documented
- **Navy personnel:** Largely undocumented
- **Defense spending %:** Requires further archival research

7.2 Venetian Republic

- **Early period (697–1100):** Virtually no quantitative economic data

- **GDP disaggregation:** Cannot separate Venice from North Italian aggregates
- **Trade volumes:** Most estimates fragmentary; few continuous series
- **Private banking capitalization:** Largely unknown
- **Military manpower:** Condottieri numbers variable and undocumented

7.3 Scholarly divergences noted

Topic	Range of Estimates	Resolution
Ottoman Istanbul c. 1600	400,000–700,000	Use moderate estimate with uncertainty
Ottoman peak territory	5.2M–24M km ²	Use 5.2M (direct control) vs. larger (with vassals)
Maddison vs. Malanima GDP (Venice c. 1500)	\$1,100 vs. \$1,500	Note both; Malanima methodology more recent
Ottoman WWI dead	325,000–771,844	Note both; Erickson includes disease deaths
